STELCO
THE MARK OF QUALITY

The dollar that keeps on buying

. . . is the dollar we keep at home!

It would not be realistic to believe that Canada could live and trade entirely within her own borders. Some products we *must* buy from offshore — but to buy foreign-made manufactured articles when a Canadian equivalent is available is to endanger the whole structure of Canada's manufacturing industries, which now provide the greatest amount of employment in Canada, and make the largest contributions to Government revenues.

The dollar we spend in Canada stays in Canada — to be circulated from hand to hand, keeping the wheels of industry turning, and enabling each of us to look forward to a continuing demand for Canadian products and services, a continuing income, and a continuing control over the resources and future of our country.

The importation of goods to compete with Canadian made products is virtually the importation of unemployment.
